Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
- I want my credit card application to be approved quickly. - I need a fair and transparent approval process. - I want to know why my application is accepted or rejected.	☐ Do I meet the bank's eligibility requirements? ☐ Will my income and credit history be enough for approval? ☐ I hope the decision is accurate and unbiased.

Rahul Kumar
*Credit Card
Applicant*

DOES

- ☐ Submits personal, employment, and financial details.
- ☐ Checks credit history and income information before applying.
- ☐ Waits for the bank's approval decision.

FEELS

- Anxious about whether the application will be approved.
- Confident if financial records are strong.
- Happy when receiving a quick and accurate decision.
